

BASiX Automation Integrators

Verizon

The Verizon facility at 25 Concord Street in Manchester, New Hampshire is a vital communication center for the entire state of New Hampshire. This large central switching site relies on the Andover Controls Continuum building management system for primary and backup control of HVAC systems and chiller plants, as well as critical alarming and energy metering. The hands-on Verizon facilities staff utilizes the power of the Andover Plain English programming and user friendly interfaces to monitor and control this important site.

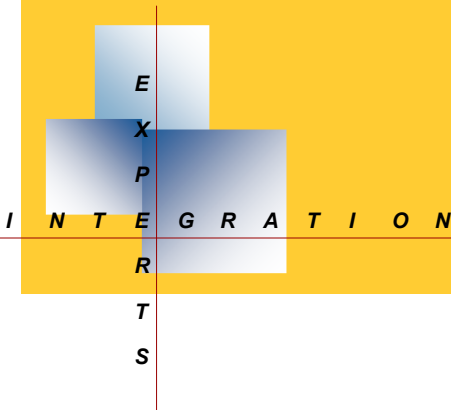

No technology can replace the key component to a successful partnership with Verizon and that is the BASiX Automation Integrators (BASiX) team approach to ensure that promises made are promises delivered. The entire BASiX staff is dedicated to designing, installing, and servicing building management systems that meet Verizon's needs now and into the future.
